

A child wearing a teal jacket, dark pants, and tan boots is walking away on a concrete sidewalk. They are holding a large, colorful umbrella with concentric rings of red, orange, yellow, green, and blue. The background shows a grassy area with some weeds and trees. A dark green diagonal overlay covers the left side of the image.

Leaders of the Future are Climate Leaders

Competencies for Climate Action

Do your key employees possess competencies, in climate action and climate accounting, and do they know how to apply these in practice? Is your organization able to turn climate actions into a catalyst for business development without expensive assistance from consultants? Are you ready to face the challenges and answer the questions posed by regulators, suppliers, and not least customers?

If not, we can help you. Our tools are comprehensive and effective training programs, which provide key employees with the competencies needed to take responsibility and work with both climate action and climate accounting. Our course participants become climate leaders who are able to help their organizations meet climate demands now and in the future.

Participants not only acquire the tools to work with climate goals, climate accounting, and business-driven climate action with knowledge of leading methods and standards (e.g. Greenhouse Gas Protocol). They also become able to tell greenwashing apart from actions that have real impact and empower the business in the future marketplace.

OUR TRAINING PROGRAMS

Climatetraining.online offers both physical and live interactive web-based training programs for key employees across the whole organization. Our offering spans from short executive briefings over comprehensive courses for employees with strategic and practical responsibility to large bespoke training programs.

Our programs are designed to ensure the necessary build-up of internal knowledge and capacity to lead and structure climate actions across the organization. Among our different programs we have something for all functions and organizational levels – regardless of whether the job at hand has to do with setting the overall course, structuring the work, or gathering relevant data and input.

ONLINE COURSE:

Climate Action and Climate Accounting

A comprehensive course for heads of functions, project managers and other team members with practical and operational responsibilities in the climate area. The course enables participants to structure, launch, lead, and communicate climate action and climate accounting. Furthermore, participants are empowered to view climate action in a business perspective and assess business value and potential.

Participants become climate leaders and culture bearers and thus become a valuable resource for colleagues across the organization.

7.5 HOURS

LEARNING OUTCOME

Price:

DKK 6.800

Per participant excl. VAT

The training program gives participants knowledge about:

- Climate concepts and agreements
- Greenhouse Gas Protocol
- Methodological foundation for climate accounting
- Scope 1, 2, 3 of climate accounting
- Leading practical work in the organization

“In our company, climate action is not just a soft value, but a prerequisite for our social responsibility and our ability to compete in the marketplace. From the program, we gained a much stronger grasp of the tools needed to develop our efforts. Apart from the high quality of the curriculum as such, we were very happy about becoming a part of a larger community with peers across industries.”

Louise Schou Petersen
Project Manager, Polar Seafood

ONLINE COURSE:

Introduction to Climate Leadership

A concentrated overview targeted at C-level management as well as non-executive directors. Participants gain knowledge of the scientific, political, and commercial imperatives for working with climate action and climate accounting – and get introduced to the principles and structure of the Greenhouse Gas Protocol. Finally, implications on strategy, leadership and operations are discussed.

By attending our executive briefing, participants gain a strong foundation for leading and delegating data-driven climate action and strategic decision-making in their organization. The executive briefing can be held in a physical format, e.g. as part of a management or board seminar.

2 HOURS

LEARNING OUTCOME

Price:

DKK 2.800

Per participant excl. VAT

The training program gives participants knowledge about:

- Strategic climate leadership
- Greenhouse Gas Protocol
- Top management’s role in the process
- Business implementation

“Working with climate action and accounting is relatively new to me, and the training program gave me a thorough understanding of the basics. The facilitator was very likeable and down-to-earth and we covered everything from global principles to concrete actions in a manner that makes me much better equipped for my future work in the field.”

Kirsten Jensen
Chief Innovation Officer, Easyfood

“Knowledge about climate action is an integral part of our future competencies as a bank, and therefore the training program is perfectly suited to accommodate our present needs.”

Ninna Holch
CSR Officer, Spar Nord

“We strive for complete transparency in the climate area and try to contribute positively to climate action in the value chains, we are part of. We have been working with this for some time now, but participating in the program has sharpened our knowledge of accounting principles, reporting and the specificities surrounding the three scopes.”

Amanda Mikkelsen
Controller and CSR Manager, Asetek

ONLINE COURSE:

Introduction to Climate Accounting

A deeper dive into collection, processing, analysis, and communication of data related to climate action and climate accounting. With the framework laid out by the Greenhouse Gas Protocol, participants gain knowledge of identification, calculation, and processing of emission data from the company and its entire value chain.

The program is targeted at employees, whose input to management serves as the basis for communication, strategic decision making and business development.

3 HOURS

LEARNING OUTCOME

Price:

DKK 2.800

Per participant excl. VAT

The training program gives participants knowledge about:

- Greenhouse Gas Protocol
- Scope 1, 2, 3 of climate accounting
- Data collection
- Methodological foundation for climate accounting

INDIVIDUALLY CUSTOMISED:

Bespoke Training Programs

Tailormade programs, where the curricula from all our programs are mixed, matched and tailored to the needs of a specific organization. Training can take place both online, in physical formats, and in blended formats. As an addition to this, we offer recorded sessions to be used on an on-demand basis, if this suits the needs of the individual company.

As an addition to the bespoke training program, our consultants are ready to advise on any concrete issue faced by the company. Among other subjects, we can advise on road maps, strategy execution and communication both on the executive level and targeted at practitioners.

X HOURS

LEARNING OUTCOME

Programs designed individually.

Participating companies acquire relevant knowledge and guidance on specific needs and business challenges.
